# Nicolas Alexandre Rodrigues Miranda RGM: 11241102017

Atividade 3 SQL Banco de Dados

Universidade de Mogi das Cruzes

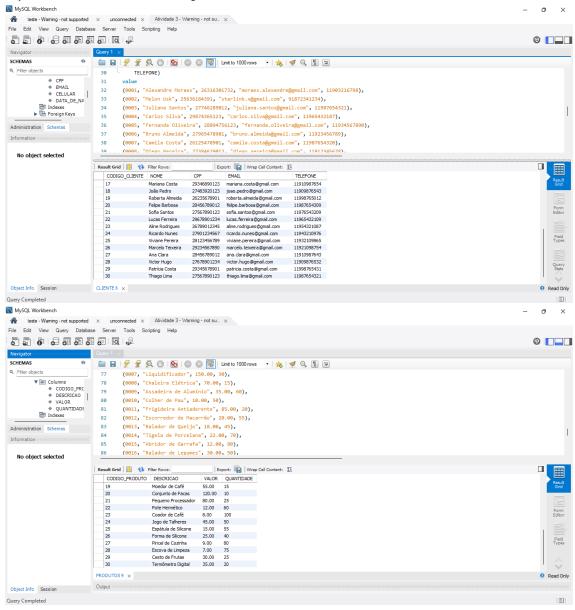

**Prof. Vanessa** 

- 1. Criar 2 entidades
  - a) Cliente(codigo cliente, nome, cpf, email, telefone)
  - b) Produtos(codigo\_produto, descrição, valor, quantidade)
  - c) Exibir as estruturas das tabelas criadas

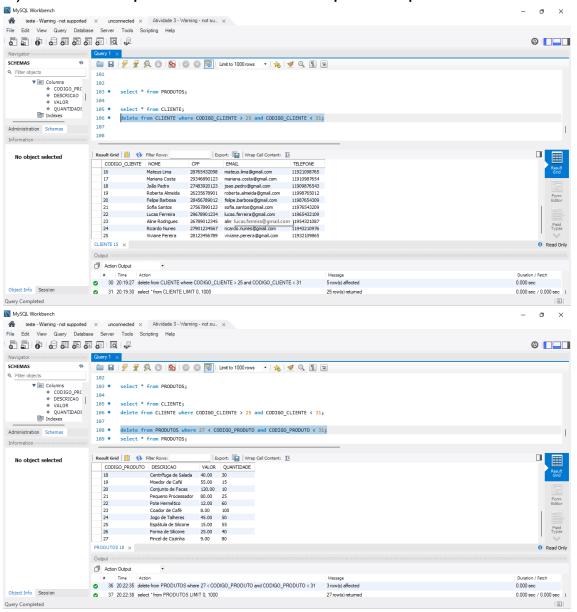

#### 2. Inserir 30 tuplas em cada entidade:

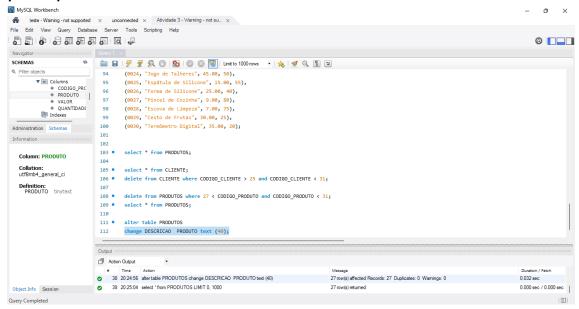

a) Exibir as informações inseridas

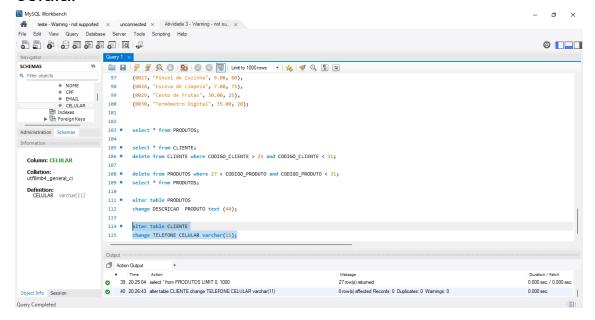

#### b) Excluir 5 tuplas de Cliente e 3 tuplas de produtos

### 3-) Mudar na Entidade Produtos o atributo descrição para produto.

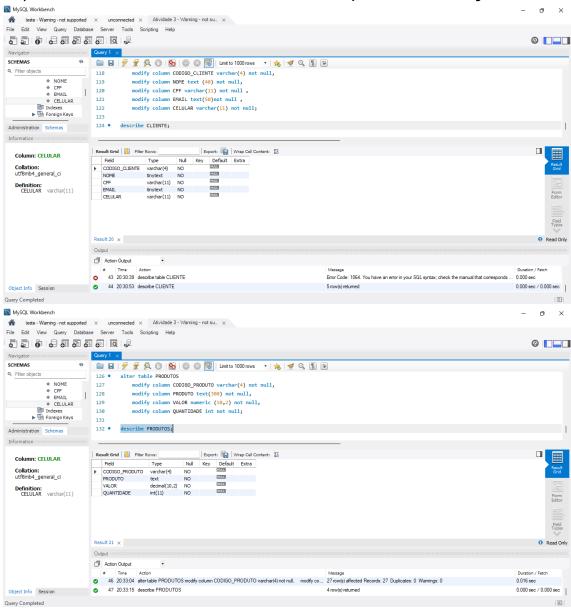

# 3-) Mudar na Entidade Cliente o atributo telefone para celular

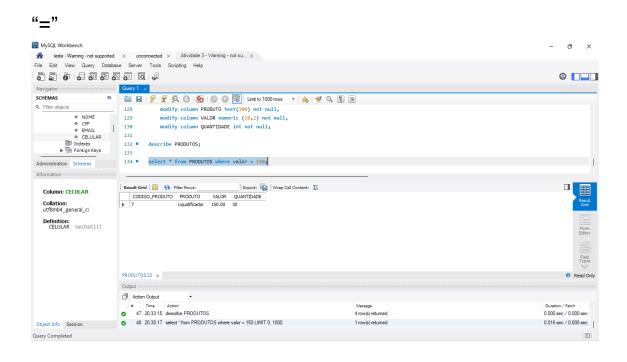

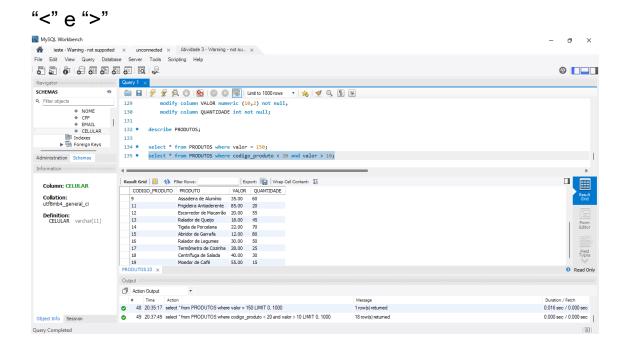

# 4-) Inserir not null em todos os atributos das duas entidades

5-) Exibir as estruturas das tabelas após as alterações

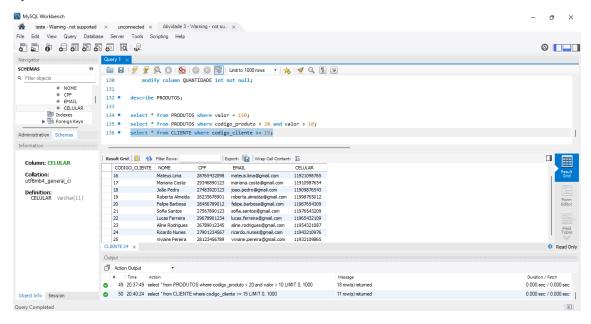

# 6-) Aplicar a busca (SELECT) com os operandos listados abaixo:

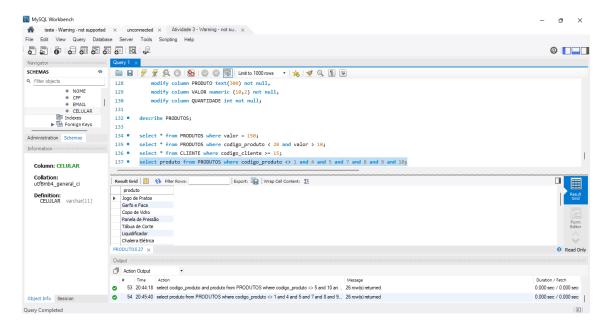

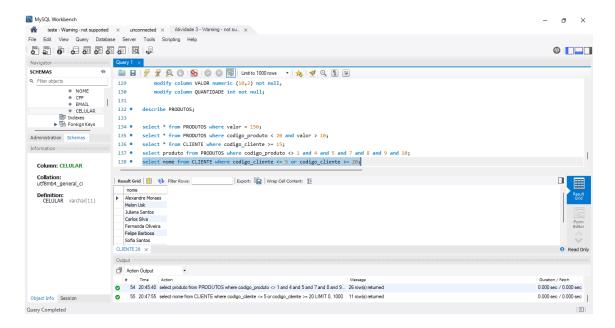

#### **">="**

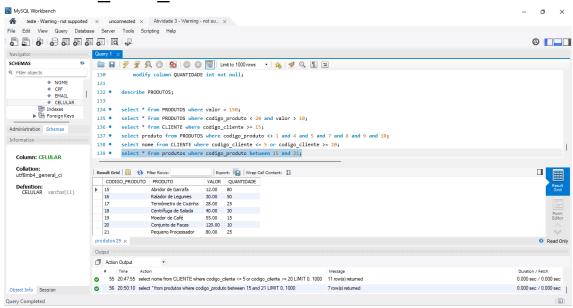

#### "<>" e "and"

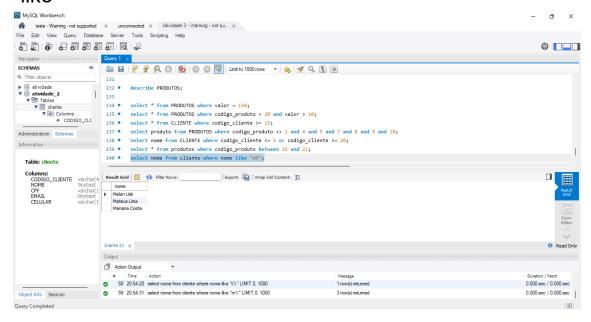

#### "or"

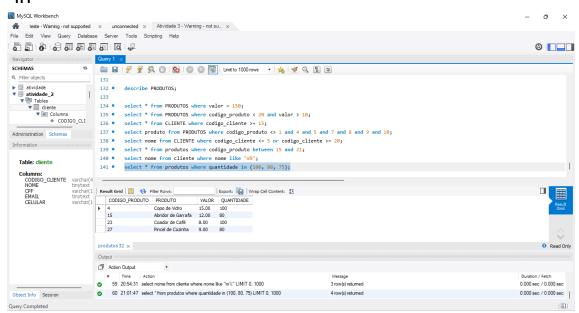

### "between \_ and \_ "

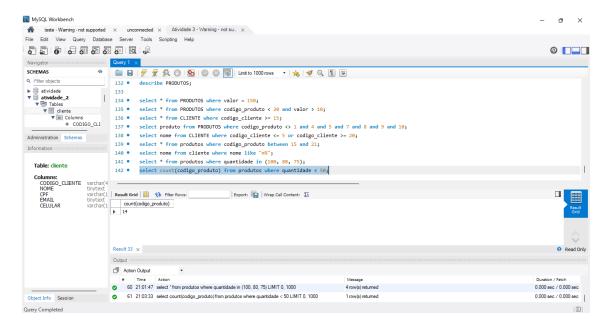

#### "like"

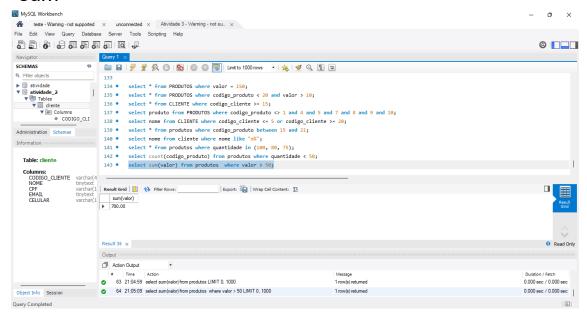

#### "in"

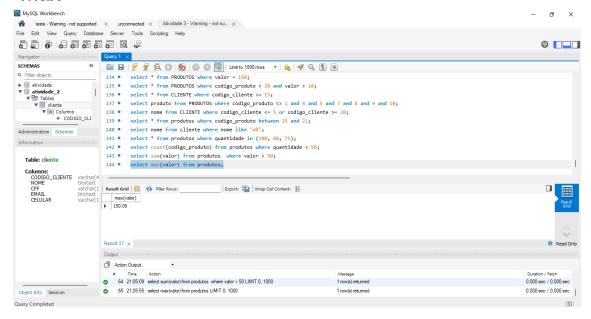

#### "count"

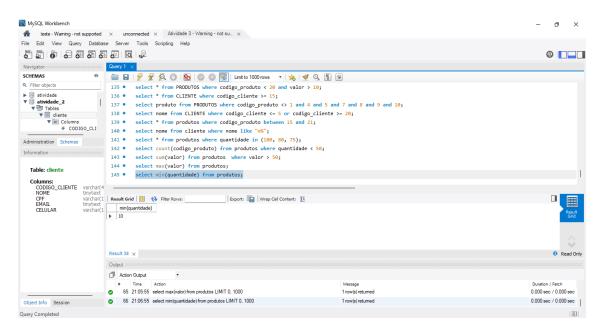

#### "sum"

#### "max"

#### "min"

### "avg"
